

You know the routine... its the end of a great weekend enjoying the lake, the family's anxious to head home and you're stuck with, among other things, the job of tarping the pontoon... now, you get to position a big heavy tarp (with a weekend's worth of spiders) on the boat... then snap about a hundred snaps... then crawl inside and set up the supports as the temperature approaches sauna levels (not to mention the trouble of tarping in the wind or rain). You could get a pontoon canopy, but they are expensive and can obstruct your view of the lake. Canopies also attract bird nests and spider webs and they sometimes blow over.

Now there is a better way... the SideWinder Roll Cover!

Roll On

1. With the SideWinder Roll Cover, you set up the support legs first. Never crawl under a hot snap-on tarp again.

2. The tarp is neatly stored on the boat, away from bugs and dirt. Simply begin rolling the tarp from the rear storage cradle to the front of the pontoon.

3. Finally, the SideWinder Roll Cover is tightened with a single turn of the crank which locks the cover in place. The taut tarp will hold up to wind while protecting your pontoon and preventing water from pooling on the surface. The heavy-duty vinyl tarp is resistant to water, tearing and ultraviolet sun damage and is available in a variety of colors.

To roll off the SideWinder, just use the crank and wind the tarp back onto the tarp storage cradle and stow the support straps and poles.

Tarp and untarp your pontoon in minutes and with hardly any effort using the "revolutionary" SideWinder Roll Cover.

Roll Off

Dump those old tarping systems for a SideWinder Roll Cover!

**SIDE WINDER** Roll Cover  
PATENT PENDING

Patent Pending

Introducing the

**SIDE  
WINDER**   
PATENT PENDING
