

Tarp Tamer

Tarp Tamer is a pair of cords made of nylon that permanently mounts to sides of your trailers and goes on top of our roll tarp. Installation takes only a few minutes. The Tarp Tamer helps in case the wind catches your tarp during the rolling process, allowing you to safely roll the tarp. This will also help reduce issues like bent poles, holes in your tarp and of course loss of revenue due to down time for repairs. The material used to make Tarp Tamers won't scratch or harm your trailer but will save you from the wind that frequents many areas. All materials used in the making are  made.
